The conference is addressed to bachelor and master level students. Conference aim is to bring together students from different universities from all over the world to discuss and present their researches on informatics and related fields (like computational algebra, numerical calculus, bioinformatics, etc.) and their results. The presentation should include also an application. Pure theoretical results are accepted only if they introduce new concepts.

Topics

Topics of interest include, but are not limited to, the following:

Algorithms and data structures	Networking
Graph theory and applications	Grid computing
Formal languages and compilers	Mobile operating systems
Cryptography	Scientific computing
Modelling and simulation	Software engineering
Computer programming	Bioinformatics
Computer vision	Robotics
Computer graphics	Computer Architecture
Game design	Evolutionary Computing
Data mining	Multimedia Systems
Distributed computing	Internet Communication and Technologies
Artificial Intelligence	Web Applications
Service oriented applications
