The conference is addressed to bachelor and master level students. The aim of the conference is to bring together students from different universities from all over the world to discuss and present their research on informatics and related fields (like computational algebra, numerical calculus, bioinformatics, etc.) and their results. The conference welcomes submissions of original papers on all aspects of informatics and related fields ranging from new concepts and theoretical developments to advanced technologies and innovative applications. Paper acceptance and publication will be judged on the basis of their relevance to the conference topics, clarity of presentation, originality and accuracy of the results and proposed solutions. The presentation should also include a practical application. Pure theoretical results are accepted only if they introduce new concepts.
