The conference is addressed in principle to bachelor and master level students, PhD students and youth scholars from all over the world. The aim of the conference is to give the participants the opportunity to discuss and present their research on informatics and related fields (like computational algebra, numerical calculus, bioinformatics, etc.) and their results. The conference welcomes submissions of original papers on all aspects of informatics and related fields ranging from new concepts and theoretical developments to advanced technologies and innovative applications. Paper acceptance and publication will be judged on the basis of their relevance to the conference topics, clarity of presentation, originality and accuracy of the results and proposed solutions. The presentation has to include also a practical application. The official language of the conference is English.

Topics (Topics of interest include, but are not limited to)

Algorithms and data structures	Networking
Graph theory and applications	Grid computing
Formal languages and compilers	Mobile operating systems
Cryptography	Scientific computing
Modeling and simulation	Software engineering
Computer programming	Bioinformatics
Computer vision	Robotics
Computer graphics	Computer Architecture
Game design	Evolutionary Computing
Data mining	Multimedia Systems
Distributed computing	Internet Communication and Technologies
Artificial Intelligence	Web Applications
Service oriented applications	

General information

Important dates

April 23, 2017 – Deadline for registration and full paper submission

May 7, 2017 – Notification of acceptance

May 14, 2017 – Submission deadline for final versions of the accepted papers

May 25 -27, 2017 – Date of the conference

Fees

Due to the support of our sponsors, there are grants available for bachelor and master students that cover the fee for participation to the conference. Please see the details on the conference site:
